The closest cited prior art, Albrecht et al (6,288,876) disclose a method for smoothing an area of a surface of metal tab by melting a lift tab with laser energy, but fails to disclose a step of separating a head suspension component from a ribbon and laser cleaning the spring metal remnants at the attachment region.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
